

Learn How To Miracle In Dentistry..
A Practical Approach

**LEARN,
PRACTICE
& EXCELL..**

The Advance General Dentistry Training Programme

What is it all about?

It is about transforming you from an amateur to a knowledgeable clinician & trained practitioner.

How does it work for me?

It is a systematically designed program where every aspect of dentistry and dental treatment has been incorporated, which are essential part of modern day practice.

How is it different from others?

First of all the focus of this program is complete general dentistry rather than just one aspect of it. It covers almost everything needed in a private practice. It not only trains you in modern clinical treatment options but also in management of your patients, staff, finances and marketing to build up your private practice.

What all does it cover?

The whole program is divided into separate modules. Each module covers one segment of dentistry & depending upon its content size one module may take anywhere in between one class to several weeks.

Why should I join?

Contemporary Dentistry & Practice is far ahead of the curriculum you get trained in the Dental Schools. This program is intended to bridge that gap if you intend to enter into private or corporate practice.

The program will also train in various modern treatment modalities and will expose you to the vast array of dental materials and their use. Finally, ask your colleagues who have joined and they will have more reasons to tell!!

A proven mantra for interns and fresh graduates of dentistry where they finally transform themselves from a student to a practitioner.

It is a systematically designed program where every aspect of dentistry and dental treatment has been incorporated which are essential parts of a modern day practice.

PROGRAM HIGHLIGHTS

- Exhaustive clinical coverage
- Fully practice oriented modules
- No bring alongs
- Everything will be provided, extending from materials to equipments
- One to one interaction
- Excellent audio visual aids
- Hands on for all clinical procedures
- Live demonstrations
- Soft and hard copies of study material and clinical solutions

Duration

06 Months
(Saturday & Sunday)

Fee

Rs. 1,50,000/

What Our Students Says?

"This was one of the best course I have ever attended. The venue, materials & facilities were excellent. The training was very inspirational, energising , bringing lot of ideas with both substantial & in-depth knowledge together with case studies & learning from experienced team of doctors"

Dr. Ravi Dutt Mishra

"It was fully practice oriented, really informative & applicable to clinical work. It also made me think critically about the cases. Mentors are extremely bright-well informative great presenters."

Dr. Dipankar Singh

"The quality of material use for our practice & training was the best of all available in the market. The curriculum of the course is so exhaustive that it caters almost every important topic requires for clinical practice, but they have managed it in such a way that the time flew by!!"

Dr. Arshad Khan

"I'm very happy to have been a part of it and learned & shared loads from the programme. I have personally gained enormous amount of knowledge in dental sciences and that will now be applied on to my patients. Thank you very much..Terrific Work"

Dr. Malik Ajaz

"One of the eye openers!! I was never so informed in my grads level that I'm today! Thanks to the advanced general dentistry training programme...I'am a dentist fully loaded with basic sciences & expertise in the material used."

Dr. Alok Kumar Singh

"I'm proud to be a student of this academy!! exhaustive practicals and energising mentors have made me what I'm today!! I must say if you have to practice dentistry after grads level this is the place you ought to be!!"

Dr. Pradumn Rai

"I'm a practicing dental surgeon today with lots of boosted up confidence!! In less than 2 years of my graduation I have already incremented upon my number of impactions and cosmetic cases. All goods to the advanced general dentistry training programme."

Dr. Shahzeb Khan

Testimonials

Course Curriculum

FIXED AND REMOVABLE ORTHODONTICS

Introduction
Growth and Development
Biomechanics
Diagnosis
Treatment Planning
Removable Appliances
Myofunctional Appliances
Straight wire Orthodontics
MBT Technique
Introduction to Invisible Orthodontics
Banding, Bonding and Wire Placement Exercises

COSMETIC DENTISTRY

Science and Concept
Smile Designing
Composite (Functional & Cosmetic Restoration)
Composite Case Selection and Technique
Diastema Closure
Light Cure: Science, Technique and Machine
Bleaching: Home, Walking, Office & Power Bleach
Veneers/Laminates
Dental Jewellery
Composite Layering and Veneer Exercises

ENDODONTICS

Rationale, Principle, Techniques
Advanced Canal Preparation Techniques with Different File System such as Hand and Motor Driven Rotary Protaper, Protaper Next, Race files, Hero Shaper, Hyflex CM, Single File Preparation System Wave One, One Shape and V-Taper2
Obturation Techniques: Lateral Condensation, Single Cone, Down Pack, Backfill and Core Carrier Obturation
Post and Core: Custom and Prefabricated; Metal and Fiber Post, Principles and Techniques of Core Buildup
Pulpotomy and Pulpectomy Procedures for Pediatric Patients
Magnification Loupes
Access Opening, BMP, Obturation, Retreatment Exercises

EMERGENCIES

IN DENTAL PRACTICE

Medical Emergencies
Basic Life Support (BLS)
Cardio Pulmonary Resuscitation
Pain Management
Bleeding Management
BLS and CPR Exercises

ORAL IMPLANTOLOGY

Introduction to Dental Implants as Treatment Choice for Missing Teeth
Basics of Implantology
Applied Anatomy
Osseointegration and Wound Healing
Surgical Principles
Diagnosis, Case Selection and Treatment Planning
Bone Biology and Assessment
Prosthetic Options
Impression Procedures
Implant Failures, Complication and Management
Immediate Extraction Implants
All on 4 Technique
Sinus Lift and Bone Manipulation
Osteotomy, Dummy Implant Placement and Impression
Transfer Exercises on Styrofoam Models

Course Curriculum

DIAGNOSIS

Systematic, Simple and Scientific Understanding of Oral Diseases
Provisional / Differential/ Definitive Features of Oral Diseases
Investigations
Key and Pathognomonic Features of Commonly Occuring Pathologies
Management

RADIOGRAPHIC TECHNIQUES & ASSESSMENT

IOPAR
RVG
OPG
Lateral Ceph
Denta Scan (CBCT)
Radiation Hazards

MINOR ORAL SURGERY

Surgical Extractions
Apicoectomy
Gingivoplasty and Gingivectomy
Closed Reductions & Intermaxillary Fixations
Incision and Drainage
Biopsy
Suturing
Electrocautery, Cryosurgery, LASER
Incision and Suturing Exercises

MEDICINAL MANAGEMENT

Basic Pharmacology
Prescription Writing in Dentistry
Dental Pharmacology, Dentifrices, Mouthwashes, Gum Paints
Fluorides, Drug Interaction

CROWN & BRIDGE

Principles and Techniques
Metal/PFM/All Ceramic/ CAD-CAM Crowns
Cementation and Luting
Gingival Retraction
Impressions: Different Materials and Techniques
Temporization
Ceramic and CAD CAM Lab Tour
Impression and Crown Preparation Exercises

PSYCHOLOGICAL MANAGEMENT

Behavior Modification
Stress and Anxiety Reduction Protocol
Child Psychology
Workplace Management

FORENSIC DENTISTRY

Methods of Investigation
DNA Identification
Forensic Anthropology
Bite Mark Registration Techniques
Role in Child Abuse, Mass Disaster, Civil & Criminal Cases

PRACTICE MANAGEMENT

Interiors and Ambience
Equipments
Patient Management
Finances
Staff

More Than 60 Hands On Exercises To be Done

- Access Opening And Canal Exploration
- Biomechanical Preparation With Conventional Hand Files
- Shaping And Finishing With Hand Protapers
- Shaping And Finishing With Rotary Protapers, Protaper Next, Hero Shaper, Hyflex Cm, Race, V-taper2
- Shaping And Finishing With Single Rotary Files – One Shape, F360
- Shaping And Finishing With Single Reciprocating Files: Wave One
- Use Of Path Files And Preparing Glide Path
- Use of Apex Locators
- Single Cone Obturation
- Down Pack and Backfill Obturation
- Thermoplastic Core Carrier GP Obturation
- Re-Endo With Protaper Retreatment Files
- Sonic and Manual Debridement
- Ultrasonic Endodontics
- Magnification Loupes
- Custom Made Post And Core
- Fibre Post and Resin Core
- Veneer Preparation
- Crown And Bridge Preparation
- Crown Luting
- Temporary Crown Fabrication
- Gingival Retraction Cord Placement
- Impression Making with Alginate
- Impression making with VPS
- Ceramic Repair
- Composite As A Restorative Material-Etching, Bonding And Composite Curing
- Shade Matching
- Multilayer Composite Techniques
- Composite Layering For Direct Veneers
- Midline Diastema Correction With Composites
- Bulkfill Restoration with Composites
- Rubber Dam Placement
- Dental Jewellery
- Home Bleaching
- Equipment Handling, Maintenance and Care
- Dental Photography
- Office Bleaching
- Fibre Splinting
- Periodontal Wire Splinting
- Periodontal Dressing
- Twin Block Fabrication And Sequential Trimming
- Wire Bending
- Orthodontic Band Fabrication
- Direct And Indirect Bracket Bonding And Wire Placement
- Soldering
- Implant Osteotomy and Implant Fixture Placement
- Implant Impression Transfers
- Immediate Post Extraction Implants
- All On 4 Implants
- Bone Manipulation Techniques
- Incisions And Flaps
- Suturing
- Maxillo-Mandibular Fixation With Arch Bars
- Electrocautery
- Cryosurgery
- LASER
- Basic Life Support
- Cardio-Pulmonary Resuscitation
- RVG
- Denta Scan
- Sterilisation
